It's "Just" Lotion

I have a friend who is a beautician and suffers from chronic fatigue, vertigo, etc. She's been through lots of tests with no luck. I have been explaining MCS to her. Just when I thought she was starting to understand, she said neither she nor her sister could wear perfume and both got rid of what they had. I asked when her sister started to have trouble because when I walked out my front door last summer, she was walking diagonally across the intersection from me. Whatever she was wearing was pretty powerful! My friend said, "Oh, its just lotion!" I snapped that they use the same thing to add fragrance to lotions as is in perfume."
